PROFESSIONAL SUMMARY

Full Stack Developer specializing in AI-integrated applications, MERN stack, Next.js, and Flutter. Independently built, signed, and published a production Flutter app to the Google Play Store via Google Play Console. Delivered 5+ end-to-end deployed products spanning real-time systems, AI-driven interfaces, and scroll-based motion design. Experienced with cloud deployment (AWS EC2), CDN delivery, push notifications, and production-grade Socket.IO/WebRTC and Gemini API integrations.

EDUCATION

Master of Computer Applications (MCA) 2024 – Present

Veer Narmad South Gujarat University (VNSGU), Surat

Bachelor of Computer Applications (BCA) Completed: 2024

Vivekanand College for Advanced Computer & Information Science, Surat — VNSGU

TECHNICAL SKILLS

AI / GenAI: Gemini API (Google), AI Prompt Engineering, LLM-based Document Parsing, AI-driven UI

Languages: JavaScript, TypeScript, Dart, SQL, HTML5, CSS3

Front-End: React.js, Next.js, Tailwind CSS, Bootstrap

Mobile (Flutter): Full Flutter development lifecycle — GetX state management, custom UI theming, Flutter Web; independently built, signed, and published an app to the Google Play Store via Google Play Console

Back-End: Node.js, Express.js, Socket.IO, RESTful API Design

Databases: MongoDB, MySQL, Supabase, MongoDB Atlas (Mongoose)

Animation / 3D: GSAP (ScrollTrigger, timelines), Three.js, 3D landing page development, scroll-jacked motion sequences

Cloud & DevOps: AWS EC2, CDN configuration, Render, Vercel, Firebase, Termius (SSH server management)

Tools & Platforms: Git & GitHub, GitLab, VS Code, Android Studio, npm, WebRTC, Clerk, RevenueCat, OneSignal (push notifications), Linear (project/issue tracking)

Concepts: RESTful APIs, MVC Architecture, CRUD Operations, JWT/OAuth, Real-Time Systems, Responsive Design, Session Management

Soft Skills: Problem-Solving, Time Management, Team Collaboration, Communication

EXPERIENCE

Junior Developer — Anantkaal, Surat May 2026 – Present

Rebuilt and independently published Parth, a therapy centre management system, as a Flutter mobile app + Flutter Web admin panel with a Supabase backend and GetX state management — handled release signing and Google Play Console publishing end-to-end (app.parthcare.com)

Developed the FTD Innovations drone & defense commercial site in Next.js 14 + TypeScript + Tailwind with GSAP scroll-jacked sequences, SVG motion paths, and coverflow product sliders (ftd-inovations.netlify.app)

Built the MyPhotoEvent AI event-photo discovery landing page using Next.js + GSAP + Lenis with cinematic scroll-triggered animation sequences (mypartyphotos.com)

Created a multi-step CRM client intake form with platform-specific OAuth guidance, field validation, and progressive onboarding flows (clientreqform.netlify.app)

Built a practice task management site (task-mngment.netlify.app) and additional client landing pages (wix-site-five.vercel.app, hashgraphvc-a7xq.vercel.app)

Software Developer Intern — DKinfoway, Surat *Nov 2025 – May 2026 / 6 Months*

Built a B2B diamond filtering & showcase platform with REST APIs for PDF generation and direct WhatsApp Business API memo delivery to jewelry clients (kodlindiamonds.netlify.app)

Implemented JWT authentication, a friend management system, and MongoDB-backed message persistence for a real-time MERN platform with Socket.IO chat and WebRTC video calling (practice assignment — chattingvc.netlify.app)

FEATURED PROJECTS

Parth — Therapy Centre Management System — *Live on Google Play Store*

Tech Stack: Flutter · Supabase · GetX · Google Play Console

Rebuilt a therapy centre management system as a Flutter mobile app and Flutter Web admin panel with a Supabase backend, GetX state management, and custom UI theming

Independently handled app signing, release builds, and store listing to publish the app live on the Google Play Store — first solo Play Console deployment

FTD Innovations — Drone & Defense Commercial Platform

Tech Stack: Next.js 14 · TypeScript · Tailwind CSS · GSAP

Built a marketing/commercial site with GSAP scroll-jacked animation sequences, SVG motion paths, and a coverflow-style product slider

Solved viewport-scaling issues on fixed-width canvas layouts using a custom useViewportScale hook and transform-origin scaling

Smart Wardrobe — AI Clothing Suggestion App

Tech Stack: Flutter · Gemini API · Supabase · Node.js

Built an AI-powered Flutter app integrating the Gemini API for context-aware outfit recommendations based on weather, calendar, and budget

Implemented a wardrobe catalogue, wear-frequency tracking, and multi-mode outfit generation with a Supabase backend and real-time weather API integration

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati

Hobbies: Gaming, Watching Anime, Listening to Music, Art & Sketching
